

There are over 10 million skiers and riders in the United States.
Together we have a better chance of fighting climate change.
 Be informed. Be part of the solution.

<p>Raise Your Voice</p>	<p>Engage with your elected officials and ask them to take swift and bold climate action - or thank them if they already have. And most importantly, VOTE!</p>
<p>Green Your Ride</p>	<p>Shift to more sustainable transportation choices like hybrid and electric cars, public transit, car sharing or carpooling. Consider buying offsets for your travel.</p>
<p>Focus on Energy</p>	<p>Reduce your use in your home and workplace and support renewable energy options. Visit the Energy Saver website for ideas: https://www.energy.gov/energysaver/energy-saver</p> 
<p>Reduce Waste</p>	<p>Curb waste, especially plastics, by going reusable or bringing your own mug, water bottle, grocery bags and straw. Recycle and compost both on and off the slopes.</p>
<p>Support Green Businesses</p>	<p>From gear and food choices to everyday services – support businesses that make sustainability a priority.</p>
<p>Engage your local ski area</p>	<p>Learn about and support their Sustainable Slopes Pledge and other sustainability initiatives: http://www.nsa.org/environment/sustainable-slopes/</p>
